Title	URL	Authors	Host item title
MALDI-MS and LC-MS characterization of various side-products during solid-phase synthesis of antiviral peptide-porphyrin conjugates		Škamo, Izabela	
Priprema meso-(N, N-dietilaminofenil)porfirina i njihova N-oksidacija		Gvozdić, Ivana	
The role of TRPA1 in pulmonary pathology		Kuprešak, Andrej	
Investigating aggregation of CRMP1 isoforms in relation to schizophrenia research		Par, Lana	
Uloga alternacija u mikrobioti crijeva u sindromu iritabilnog crijeva		Kukac, Ela	
Funkcionalni hidrogelovi temeljeni na Fmoc-aminokiselinama		Dražić, Ena	
Tandem mass spectrometry in combination with ion mobility for characterization of cardiolipin molecular diversity		Novak, Angelo	
The Pathogenicity of Tafazzin Variants and their Implications in Barth Syndrome: A Bioinformatics Analysis		Markesina, Irma	
A critical review of purported health benefits of kombucha consumption		Ladavac, Inge	
Development of a yeast model system for interrogating the influence of beta-oxidation on mitochondrial cardiolipin turnover		Ivanov, Ana Maria	
Effect of disrupting the mRNA turnover on the genome-wide RNA 3'-end structure		Jurković, Borna	
Development of an LC-MS/MS method for the assessment of the effect of spinal cord injury on dysbiosis and short-chain fatty acid quantity in rats		Soldatić, Karla	
Eikozanoidi izvedeni iz dijeta i fenotip u sepsi		Reynolds, Christian Andrew	
EHD3 aggregation depends on more than one critical region		Fartek, Tina	

Spektrofotometrijske metode i metode spektrometrije masa u određivanju razlika između dva proizvodna procesa vina		Ožbolt, Eva	
Povijesni podaci o kontrolnim miševima i štakorima iz pretkliničkih studija toksičnosti		Debelec, Mihael	
Purinergic receptor antagonism: A viable strategy for the management of autonomic dysreflexia?		Minić, Željka; O'Leary, Donal S.; Reynolds, Christian A.
